

MULTIGRIP PLIERS

Versatile pliers with very wide clamping range

▶ **MN-20-640, MN-20-641, MN-20-642**

- Pliers available in 3 sizes: 180, 250, 300 mm
- Intended for clenching on fixtures of up to 42 mm, 50 mm, and 70 mm in size
- High material and finish quality
- Sturdy body
- Excellent value for money
- Indispensable to plumbers and installers
- Black oxide finish for improved corrosion protection

▶ **FEATURES AND BENEFITS**

VERY WIDE JAW CLAMPING RANGE, making the pliers versatile and highly functional.

BUTTON-CONTROLLED JAW WIDTH for optimised adjustment to fixtures of different sizes, making the tool convenient to handle without using much force.

UNIQUE JAW DESIGN and hardened teeth for secure and infallible grip, minimising the risk of jaw skidding on fixtures.

HIGH QUALITY Cr-V STEEL for high mechanical strength and durability of the pliers, and additional body coat for improved corrosion protection.

COMPACT JAW DESIGN eliminating the risk of slipping off fixtures, and enhancing work efficiency and quality, even in areas difficult to reach.

VERSATILITY which makes the pliers suitable for a wide range of plumbing, installation, mechanical and many other jobs.

▶ **APPLICATIONS**

- Useful for plumbing, installation, and mechanical jobs
- Intended for clenching on fixtures of up to 42, 50, and 70 mm in size

▶ **USERS**

- Plumbers
- Installers
- Mechanics
- DIYers
