

MN-65-18 Jig saw blades for aluminum and steel

Jig saw blades made of high-speed steel with milled teeth

Features & benefits

- Made of high speed steel which, thanks to high hardness, increases the service life of the product and work efficiency
- Milled and undulated teeth enable the quick cutting of metal and do not fray the edges of the material being cut
- T-type handle, which is the most common handle that fits most jig saws available on the market
- Wide range enables you to make straight and curved cuts, fast and precise

Applications

- For cutting steel and non-ferrous metals such as aluminum or copper
- Intended for use with jig saws

Equipment

- 3 blades per package

Users

- Fitters
- Tinmen
- Locksmiths
- Plumbers
- DIY enthusiasts

Corresponding products
