

RT-IS Impact sockets drive 1/4"

Impact sockets designed to overcome the high torsional forces

Product information

Features and benefits

- Special steel S2 with specification 65Si-MoCr4 and high hardness extends the life of the product
- An additional black manganese-phosphorus coating protects the product against corrosion
- 1/4" grip hex allows the use of most commercially available impact drivers and cordless screwdrivers
- Ideally milled slot allows good lateral hold of screws and bolts when screwdriving
- Powerful internal magnet holds the bolts and screws while screwdriving

Applications

- Screwdriving in concrete, connecting screws, threaded rods and roof fasteners
- Designed to work with impact driver and cordless screwdriver

Corresponding products

- R-WCS Screw for concrete
- R-WB Self-drilling screws for steel
- OC Self-drilling screws
- R-LX-H-ZF Zinc flake coated Hex Concrete Screw Anchor
