

**MN-70-50 Painted level 100 cm, 90°, 0°, DIP 2,3%, Shock Protekt [Expert]**

**Made in Poland, top quality painted spirit levels with a measuring accuracy of up to 0.4 mm/m**

**Features & benefits**

- Measurement accuracy up to 0.4 mm/m.
- Very good value for money and functionality.
- Polish production guarantees the highest precision of workmanship and its repeatability.
- All products have certificates confirming the quality and parameters.
- 2 spirit levels show the vertical and horizontal.
- Spirit level without sharp edges, made of high-quality acrylic glass, can be easily and quickly cleaned of dirt.
- The powder-coated coating protects the aluminum spirit level by creating an abrasion-resistant protective layer.
- SHOCK PROTECT side shock absorbers absorbing the impact force in the event of a vertical fall.
- 100-year warranty on the fixing and seating of the vials.
- The level vial has an additional graduation to determine a 2.3% gradient to facilitate installation and finishing work.
- The alcohol-based liquid filling the vials is completely UV-resistant and does not fade over time, and the bubble does not separate into smaller ones even after impact.
- DUAL PROTECT vials have double shatterproof protection, thus guaranteeing high resistance to mechanical damage caused by falls or impacts.

**Applications**

- Levels designed for construction work.

**Users**

- Tilers
- Bricklayers
- DIY enthusiasts
- Gypsum plasterers
- Plumbers
