

R-STUDC Composite rebar

Composite rebar with a flat tip for use with bonded anchors.

Product information

Features and benefits

- High-performance bonded anchors offer high load-bearing capacities
- Can be post-installed through fixture in some cases. (Consult technical advisory service)
- Flat head for quick manual installation without a setting tool

Applications

- Shipbuilding
- Offshore technology
- Swimming pool technology
- Plants in the chemical industry
- Heat exchangers and evaporators
- Flue gas desulphurization plants
- Tanks for aggressive chemical products
- Tunnel construction

Installation guide

1. Drill hole to the required diameter and depth for stud size being used.
2. Clean the hole thoroughly with hand pump and hole brush
3. If required, insert the mesh sleeve into position
4. Fill hole with the required resin to the recommended fill level. (Follow the relevant instructions for the resin product)
5. Insert the threaded stud slowly and with a slight twisting motion, until the required embedment depth is reached
6. Leave undisturbed until curing time of resin has elapsed
7. Attach fixture and tighten the nut to the required installation torque
