

MN-30-6 Locksmith's hammers

Fiberglass locksmith's hammers with a two-component handle

Features & benefits

- The hammer head made of high quality forged carbon steel with HRC 50-58 hardness ensures high durability of the hammer
- The chamfer width of the impact face is greater than 1/10 of the diameter of the impact surface, which minimises chipping and extends the lifetime
- Smooth impact part of the hammer head guarantees high precision of work
- The handle is made of 65% fiberglass, ensuring durability and vibration dampening, increasing comfort of work
- Two-component, rubberized, non-slip handle guarantees a secure grip and high comfort of use

Applications

- Designed for various types of work in the workshop, on the construction site, at home (hammering, straightening, etc.)

Users

- Joiners
- Roofers
- Road workers
- Gypsum plasterers
- Tilers
