

Revision: 01.03.2023 Version: 1.0/EN

## **Safety Data Sheet**

in accordance the Commission Regulation (EU) No 2020/878 of 18 June 2020 amending Annex II to Regulation (EC) No 1907/2006 of the European Parliament and of the Council concerning the Registration, Evaluation, Authorization and Restriction of Chemicals (REACH)

## Section 1: Identification of the substance/mixture and of the company/undertaking

## 1.1. Product identifier

R-KER, R-KER-S, R-KER-W

UFI code: V410-H0VT-A00R-EA6X

## 1.2. Relevant identified uses of substance or mixture and uses advised against

<u>Identified uses:</u> Chemical anchoring system for building industry

Uses advised against: Every way of using not mentioned above or in the point 7.3

## 1.3. Details of the supplier of the safety data sheet

Company name and address:

Rawlplug S.A. ul. Kwidzyńska 6 51-416 Wrocław

Poland

Telephone number: 730 975 700

E-mail (competent person): infochem@rawlplug.com

## 1.4 Emergency telephone number

Nationwide emergency phone number (8:00 – 16:00): + 48 71 320 91 00

PL: 112 (emergency call)

## **Section 2: Hazards identification**

#### 2.1. Classification of the substance or mixture

## Classification according to Regulation (EC) No 1272/2008

Physical and chemical hazards:

This mixture does not present a physical hazard.

Health hazards

Sensitization Skin, Hazard Category 1 [Skin Sens. 1]

May cause an allergic skin reaction (H317)

Serious eye damage/eye irritation, Hazard Category 2 [Eye Irrit. 2]

Causes serious eye irritation (H319)

Specific target organ toxicity Repeated exposure, Hazard [Category 2] [STOT RE 2]

May cause damage to organs through prolonged or repeated exposure [lungs] (H373)

Specific target organ toxicity - Single exposure, Hazard Category 3, Respiratory tract irritation [STOT SE 3] May cause respiratory irritation (H335)

#### **Environmental hazards:**

Hazardous to the aquatic environment - Chronic Hazard, [Category 2] [Aquatic Chronic 2]

Toxic to aquatic life with long lasting effects (H411)

#### 2.2 Label elements

## Labelling according to Regulation (EC) No 1272/2008 **Pictograms**

GHS08

GHS07

GHS09

#### Signal word: Warning

#### Supplemental Hazard Statements on labels

Contains: Methacrylic acid, monoester with propane-1,2-diol; Ethylene dimethacrylate; Quartz (SiO2); Dibenzoyl peroxide; 1-isopropyl-2,2-dimethyltrimethylene diisobutyrate; Reaction mass of 2,2'-[(4-methylphenyl)imino]bisethanol and Ethanol 2-[[2-(2-hydroxyethoxy)ethyl](4-methylphenyl)amino]-4-tert-butylpyrocatechol

#### Hazard statement(s)

H319 Causes serious eye irritation.

H373 May cause damage to organs through prolonged or repeated exposure [lungs]

H317 May cause an allergic skin reaction.

H335 May cause respiratory irritation

H411 Toxic to aquatic life with long lasting effects

#### Precautionary statement(s)

## **Prevention:**

P264 Wash hands thoroughly after handling.

P260 Do not breathe dust

P280 Wear protective gloves/protective clothing/eye protection/face protection.

P102 Keep out of reach of children

#### Response:

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P302 + P352 IF ON SKIN: Wash with plenty of water.

P304 + P340 IF INHALED: Remove person to fresh air and keep comfortable for breathing.

#### Disposal:

P501 Dispose of contents/container in accordance with local/regional/national/international regulations.

## 2.3 Other hazards

The substances contained in the product do not meet criteria for PBT or vPvB in accordance with Annex XIII of REACH Regulation. The product does not contain substances included in the list established in accordance with Article 59 (1) for having endocrine disrupting properties, or substances identified as having endocrine disrupting properties in accordance with the criteria set out in Commission Delegated Regulation (EU) 2017/2100 (3) or Commission Regulation (EU) 2018/605 at a concentration equal to or greater than 0,1 % by weight.

**Section 3: Composition/information on ingredients**

<sup>[1]</sup> Substance with national exposure limit in the workplace

Full H phrases are specified in point 16 hereof.

## Section 4: First aid measures

## 4.1. Description of first aid measures

First-aid measures general:

Never give anything by mouth to an unconscious person. If you feel unwell, seek medical advice (show the label where possible).

Inhalation: Remove victim to fresh air and keep at rest in a position comfortable for breathing.

<sup>[2]</sup> Substance with UE exposure limit in the workplace

Skin contact: Wash with plenty of soap and water. Remove/Take off immediately all contaminated

clothing. Wash contaminated clothing before reuse. If skin irritation or rash occurs: Get

immediate medical advice/attention.

Get immediate medical advice/attention. Immediately rinse with water for a prolonged Eye contact:

period while holding the eyelids wide open. Remove contact lenses, if present and easy to

do. Continue rinsing. Consult an eye specialist.

Drink plenty of water. Do not induce vomiting. Rinse mouth. Immediately call a POISON Ingestion:

CENTER or doctor/physician.

#### 4.2. Most important symptoms and effects, both acute and delayed

May cause an allergic skin reaction. Skin contact: Eye contact: Causes serious eye irritation

Ingestion: May cause irritation of the mucous membranes of gastrointestinal tract, nausea, vomiting, Inhalation: There may be irritation. Exposure may cause coughing or wheezing. May cause damage to

organs [lung organs] through prolonged or repeated exposure.

#### 4.3. Indication of any immediate medical attention and special treatment needed

Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.

## **Section 5: Firefighting measures**

#### 5.1. Extinguishing media

Suitable extinguishing media:

Foam, powder, carbon dioxide, water in spray.

Unsuitable extinguishing media: Do not use a heavy water stream

## 5.2. Special hazards arising from the substance or mixture

During combustion harmful gases consisting of carbon oxides may be produced. Do not inhale combustion products, may cause health risk.

#### 5.3. Advice for firefighters

Personal protection typical in case of fire. Do not stay in the fire zone without self-contained breathing apparatus and protective clothing resistant to chemicals. Containers may burst if heated due to the rise of pressure. In case of fire cool endangered containers with water fog from safe distance. Do not let extinguishing water to reach drainage system. Collect used extinguishing media.

## **Section 6: Accidental release measures**

#### 6.1. Personal precautions, protective equipment and emergency procedures

For non-emergency personnel

Take unprotected persons out of the risk area. Avoid direct contact with the mixture. Do not inhale dust. Remove all sources of ignition.

Avoid airborne dust generation, wear personal protective equipment in compliance with national legislation. Provide adequate ventilation.

For emergency responders

Ensure that breakdown and its results are only trained personnel. Use personal protective equipment.

## 6.2. Environmental precautions

Do not flush into surface water or sanitary sewer system. Prevent further leakage or spillage if safe to do so. If the product contaminates rivers and lakes or drains inform respective authorities.

#### 6.3. Methods and material for containment and cleaning up

Collect spillage. This material and its container must be disposed of in a safe way, and as per local legislation. Recover mechanically the product. On land, sweep or shovel into suitable containers. Store away from other materials. Dispose of materials or solid residues at an authorized site.

#### 6.4 Reference to other sections

See Section 8 for information on appropriate personal protective equipment. See Section 13 for additional waste treatment information.

#### Section 7: Handling and storage

#### 7.1. Precautions for safe handling

Precautions for safe handling

Wear personal protective equipment. Avoid contact with skin and eyes. Wash hands and other exposed areas with mild soap and water before eating, drinking or smoking and when leaving work. Avoid contact during pregnancy/while nursing. Do not eat, drink or smoke when using this product. Contaminated work clothing should not be allowed out of the workplace. Avoid exceeding the given occupational exposure limits (see section 8). For personal protection see section 8. Use only non-sparking tools. Take precautionary measures against static discharge.

#### 7.2. Conditions for safe storage, including any incompatibilities

Store in original container, keep tightly closed when not in use. Protect from direct sunlight and other heat sources in dry, well-ventilated area, away from incompatible materials, food and drink. Store at 5-25 °C. To ensure product stability avoid temperature fluctuation during storage (overheating and undercooling).

## 7.3. Specific end use(s)

Chemical anchoring system for building industry.

## **Section 8: Exposure controls/personal protection**

## 8.1. Control parameters

Remarks	

Belgium (1) Additional indication "D" means that the absorption of the agent through the skin, mucous membranes or eyes is an important part of the total exposure. It can be the result of both direct contact and its presence in the air. (2) Additional indication "M" means that irritation occurs when the exposure exceeds the limit value or there is a risk of acute poisoning. The work process must be designed in such a way that the exposure

never exceeds the limit value. For evaluation, the sampled period should be as short as possible. However, the sampled period shall be long enough to perform a reliable measurement. The measured result shall be related to the considered period. ## Recommended monitoring procedures

Monitoring procedures should be used fot concentrations of hazardous components in the air. Air quality control

procedures should be used in the workplace - as long as they are available and reasonable for the job - in accordance with the relevant Polish or European Standards, taking into account the conditions prevailing at the site of exposure and corresponding measurement methodologies adapted to the conditions work. Mode, type and frequency of tests and measurements should meet the requirements of the Regulation of the Minister of Health on 2 February 2011. (Dz. U. 2011 No. 33, item. 166).

#### 8.2. **Exposure controls**

#### 8.2.1 Appropriate engineering controls

Use process enclosures, local exhaust ventilation, or other engineering controls to keep airborne levels below recommend exposure limits. If user operations generate vapours, fume or mist, use ventilation to keep exposure to airborne contaminants below the exposure limit

#### 8.2.2 Individual protection measures, such as personal protective equipment

**Breathing equipment:** Not required in case of adequate ventilation. In case of brief exposure or low pollution use

> respiratory filter device. At concentrations causing irritation use mask with filter. . Respirator selection must be based on known or anticipated exposure levels, the hazards of the product

and the safe working limits of the selected respirator.

Eye protection: Safety eyewear complying with an approved standard should be used when a risk assessment

indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts.

Protection of hands: Chemical-resistant, impervious gloves complying with an approved standard should be worn at

> all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be

accurately estimated.

Personal protective equipment for the body should be selected based on the task being **Body Protection:** 

performer and the risks involved and should be approved by a specialist before handling this

product.

Other skin protection: Appropriate footwear and any additional skin protection measures should be selected based on

the task being performed and the risks involved and should be approved by a specialist before

handling this product.

Hygiene at work: Apply general hygiene at work rules. After work, remove contaminated clothes and wash

thoroughly the whole body. Wash your hands and face during breaks. Restrain from drinking

and eating or smoking at work.

#### 8.2.3 Environmental exposure controls

Avoid release to the environment, do not enter the sewage system. Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation.

## **Section 9: Physical and chemical properties**

## 9.1. Information on basic physical and chemical properties

**Appearance** Paste Solid

Colour: Component A: light grey

Component B: Black

Odour: Characteristic

Smell threshold Information unavailable Information unavailable Melting/ clotting point Initial boiling point and boiling range: Information unavailable Flammability: Information unavailable Upper/lower flammability or explosive limits: Information unavailable Flash point: Information unavailable

Auto-ignition temperature: Component A:  $1.65 \pm 0.1$  [g/cm3]

Component B: 1.4 - 1.5 [g/cm3]

Decomposition temperature: Information unavailable

Component A: 5

Component B: no data available

Solubility: Insoluble in water Partition coefficient: n-octanol/water: Information unavailable

Vapour pressure: Not applicable (product is in solid state) Density and/or relative density Component A:  $1.65 \pm 0.1 \text{ [g/cm3]}$ 

Component B: 1.4 - 1.5 [g/cm3]

Information unavailable Relative vapour density

Particle characteristics Paste

#### Other information 9.2

#### 9.2.1 Information with regard to physical hazard classes

Information unavailable.

## 9.2.2 Other safety characteristics

Information unavailable.

## Section 10: Stability and reactivity

#### 10.1 Reactivity

No reactivity under recommended storage and handling conditions.

#### 10.2 Chemical stability

Product is stable under normal storage conditions (temp. 5 - 250C). In the case of visible changes in the consistency of the product, the presence of significant amounts of air in components it is recommended to cessation work with the product.

## 10.3 Possibility of hazardous reactions

No further relevant information available.

#### 10.4 Conditions to avoid

To avoid thermal degradation of product do not allow to overheat it over the temperature of recommended storage. Protect from sunlight.

## 10.5 Incompatible materials

No specific data.

#### **Hazardous decomposition products**

Depending on the decomposition conditions, complex mixtures of chemical substances can be released: carbon dioxide (CO2), carbon monoxide and other organic compounds. Reference to other sections: 5.2.

## **Section 11: Toxicological information**

## 11.1 Information on hazard classes as defined in Regulation (EC) No 1272/2008

#### **Toxicity of mixture**

ATE MIX oral (mg / kg):>2000 The mixture does not contain substances classified in this hazard class. ATE MIX dermal (mg/kg): ):>2000 The mixture does not contain substances classified in this hazard class. ATE MIX inhalation (mg/I/4h):>20 The mixture does not contain substances classified in this hazard class.

\*ATEmix value was calculated using relevant converted acute toxicity point estimate included in 3.1.2 table from Regulation 1272/2008/EC.

#### Skin corrosion/irritation

Based on available information, classification criteria are not met.

## Serious eye damage/irritation

Causes serious eye irritation

#### Respiratory or skin sensitization

May cause an allergic skin reaction.

#### Germ cell mutagenicity

Based on available information, classification criteria are not met.

#### Carcinogenicity

IARC: No component of this product present at levels greater than or equal to 0.1% is identified as probable, possible or confirmed human carcinogen by IARC.

#### Reproductive toxicity

Based on available information, classification criteria are not met.

#### Specific target organ toxicity - single exposure

May cause respiratory irritation

#### Specific target organ toxicity - repeated exposure

May cause damage to organs through prolonged or repeated exposure [lungs]

Based on available information, classification criteria are not met

#### Delayed and immediate effects as well as chronic effects from short and long-term exposure

Skin contact: May cause an allergic skin reaction. Eye contact: Causes serious eye irritation

Ingestion: May cause irritation of the mucous membranes of gastrointestinal tract,

nausea, vomiting,

Inhalation: There may be irritation. Exposure may cause coughing or wheezing. May

cause damage to organs [lung organs] through prolonged or repeated

exposure.

#### 11.2 Information on other hazards

#### 11.2.1 Endocrine disrupting properties

The components of the mixture do not affect the functioning of the hormonal system in accordance with the evaluation criteria defined in the Regulations: (EC) No 1907/2006, (EU) 2017/2100, (EU) 2018/605.

## 11.2.2 Other information

Not applicable to substances.

## **Section 12: Ecological information**

## 12.1 Toxicity

Toxic to aquatic life with long lasting effects

In order to minimise long term global pollution consideration should be given to:

- Reduction in consumption of disposable products and packaging.
- Participation in recycling activities

#### 12.2 Persistence and degradability

It is not determined for the mixture.

#### 12.3 Bioaccumulative potential

It is not determined for the mixture.

#### 12.4 Mobility in soil

Insoluble in water.

The mobility of the substance depends on their hydrophilic and hydrophobic properties and abiotic and biotic conditions of soil, including its structures, climatic conditions, seasons (in Poland, in a variable moderate climate) and soil organisms, mainly (bacteria, fungi, algae, invertebrates).

#### 12.5 Results of PBT and vPvB assessment

PBT/vPvB assessment not available as chemical safety assessment not required/not conducted.

#### 12.6 Endocrine disrupting properties

The product shall not contain ingredients included on the list established in accordance with Article 59(1) as having endocrine disrupting properties or ingredients with endocrine disrupting properties according to the criteria laid down in Regulation 2017/2100/EU or Regulation 2018/605/EU in concentrations equal to or greater than 0.1%.

#### 12.7 Other adverse effects

The mixture is not classified as hazardous to the ozone layer. There should be considered the possibility of other harmful effects of the individual components of the mixture on the environment. (eg. the ability of disrupting endocrine, the impact of global warming potential).

# **Section 13: Disposal considerations**

#### 13.1. Waste treatment methods

#### Product:

Minimum waste quantities. Must not be disposed together with household garbage. Do not allow product to reach sewage system, ground water and water course. Uncured product dispose of as a chemical waste in licensed facility, in accordance with local regulations of environmental protection and binding legislation on recycling. It is recommended to incinerate wastes arose during product usage in a proper incineration oven. Small quantities of both components may be reacted together, allowed to cure and dispose of as a solid waste.

## Packaging:

Used product packaging (cartridge) may be delivered to plastic waste recycling plant. Contaminated package must be disposed like wastes arose during product usage

#### Hazardous waste codes (EWC):

16 05 08\* discarded organic chemicals consisting of or containing hazardous substances 15 01 10\* packaging containing residues of or contaminated by hazardous substances Legal basis: Directive 2008/98/EC /2014/955/UE

## Section 14: Transport information

#### 14.1 UN number or ID number

ADR/RID/IMDG/IATA: UN3077

## 14.2 UN proper shipping name

ADR/RID/IMDG/IATA: ENVIRONMENTALLY HAZARDOUS SUBSTANCE, SOLID, N.O.S

Special provisions 274: Dibenzoyl peroxide

#### 14.3 Transport hazard class (es)

ADR/RID/IMDG/IATA: 9

#### 14.4 Packing group

ADR/RID/IMDG/IATA: III

#### 14.5 Environmental hazards

ADR/RID/IMDG/IATA: The product is classified as dangerous for the environment according to criteria contained in the transport rules

#### 14.6 Special regulations:

**ADR**

(STOT) SE	Single Exposure
SVHC	Substances of Very High Concern
vPvB	Very Persistent and Very Bioaccumulative

# **Training**

Prior to working with the product you should be familiar with safety rules for handling the chemicals, in particular take proper workplace training.

People associated with the transport of hazardous materials in accordance with ADR should be adequately trained to perform their duties (general training, bench and safety).
