

# RPP-FIX-60S Express polyurethane adhesive

Professional fast foam adhesive with high adhesion to many materials and substrates

### **Product information**

### **Applications**

- Installation of plasterboards and OSB boards for walls and floors
- For bonding expanded polystyrene boards (EPS), extruded polystyrene boards (XPS) and polyurethane rigid foam boards (PUR)
- Insulation of containters or garages
- · Filling gaps in thermal insulation
- Fastening of ceramic blocks, aerated concrete blocks and silicate blocks
- · Installation of window sills and stairs
- For bonding decorative elements, coffers, floor moldings

### Features and benefits

- · Initial tack after 60 seconds
- Mechanical anchoring after 2h
- · Complete hardening time after 24h
- Wide range of applications
- Excellent adhesion to common construction materials
- · Easy and convenient application

#### **Base materials**

#### Suitable for use in

- Polystyrene (EPS) Boards
- Plasterboard
- PVC Profile
- Metal Sheet & Profiles
- XPS Extruded Polystyrene Insulation Boards
- Oriented Strand Board
- Mineral Wool Boards
- Timber
- · Solid Brick
- Concrete
- Ceramic Hollow Block
- Silicate Blocks

## Installation guide

- 1. Wear protective gloves. Ensure surfaces are free from dust, dirt, lime or grease. If the wall surface is dirty it must be primed.
- 2. Before using, make sure that the can temperature is above zero (optimum +20°C). Application temperature from +5°C up to +30°C.
- 3. Shake can vigorously for 30 seconds to mix properly components.
- 4. Screw gun onto the can. Hold can upside-down during application.
- 5. Moisten surfaces with water prior to application.
- 6. Fill gaps from down to up, zigzag motion, alternating from one wall to the other. Fill gaps to approximately 60 % volume. Max. wide of the gap 3-4 cm. Wider gaps should be applied after hardening of the previous layer. Each layer should be moistened with water using a spray.
- 7. After full curing, cut the excess foam with a knife and protect it from UV exposure by coating with plaster, paint, acrylic or silicone.
- 8. In the event of a stoppage exceeding five minutes duration, wipe the nozzle with cleaner for foam applicator.
- 9. After removing the applicator gun from the can, wipe down the nozzle and gun (internal and external surfaces) using a cleaner.

# **Technical Data**

Parameter		Value	Methods	
Application temperature	[°C]	+5 ÷ +30		
Can temperature	[°C]	20		
Colour	-	Light yellow		
Correction time	[min]	3		
Skin formation time	[min]	2-4	23°C, RH 50%	
Complete hardening time	[h]	24		
Preparations solublity	-	Acetone, before hardening	Cleaner RPC-0500	
Fire resistance class	-	B3	DIN 4102	
Thermal resistance (upon hardening)	[°C]	-50 ÷ +90		
Thermal conductivity	[W/mK]	0,036		
Volume	[ml]	750		
Density	[g/cm <sup>3</sup> ]	1,85		

Parameter		Value		
Shelf life [month]		12		
Storage conditions		upright position in an originally closed container		
		the storage temperature: from +5°C to +35°C (room temperature is recommended)		
		dry, cool and well-ventilated place away from direct sunlight and other sources of heat and ignition		
		storing the product in conditions other than recommended may shorten the life time even by 3 months
