

## MN-61-20 Bits for ceramics and glass

### Bits for drilling in glass and ceramic materials

### Features & benefits

- High-quality cemented carbide improves the service life of the drill
- Suitably sharpened cutting insert enables drilling without impact and without material fracture
- Deeply embedded cutting insert improves the lifetime of the drill bit
- Straight shank of the drill can be used in chuck tool holders and quick-action chucks of the majority of drills accessible on the market

### Applications

- For drilling in glass and ceramic materials
- Intended for using with a drill and cordless drill-driver

### Users

- Tilers
- Fitters
- Plumbers
- DIY enthusiasts
