

RT-DDC Diamond discs Ceramic Ultra Thin

Thin diamond discs for precision cutting of tiles, terracotta and marble and ceramic tiles

**Certificate
EAC**

Product information

Features and benefits

- The special shape of the diamond ring enables precise and efficient cutting of materials
- High ring provides extra time for work
- The thin cross section of the blade with a reinforced mid-section allows for precise cutting
- Compensation grooves cool the discs allowing for dry and wet work
- High-quality connection between the ring and the disc increases the service life
- The internal bores of 22,23 mm and 25,4 mm allow for use with all angle grinders and stationary cutters available on the market

Applications

- Precise cutting of tiles, terracotta, marble and ceramic tiles
- Suitable for operation with angle grinders

Base materials

- Gres
- Terracotta
- Tile
