

MN-79-358 Four-pronged fork fibreglass

Fork with teeth made of hardened steel with durable fibreglass type handle, 112 cm

Features & benefits

- Working part made of high-quality hardened steel ensures resistance to abrasion and bending
- Powder paint on teeth protects the tool against corrosion
- Stem made of special fibreglass plastics improves cracking resistance
- "Grabbing" parts of handle are made of special plastics, reducing fatigue during work
- Hardened teeth, with large cross-sections, are resistant to damage

Applications

- Intended mainly for digging and laying of compost, leaves etc.

Users

- Gardeners
- DIY enthusiasts
