

# R-SL-TK High Temperature Silicone

High-temperature silicone – One-component elastic sealant with acetate curing system.

### **Product information**

### **Applications**

- Sealing in high-temperature environments: furnaces, chimneys, heating installations, combustion & flue ducts, ventilation and air-conditioning systems.
- Fixing of elements in domestic fireplaces and industrial furnaces.

#### Features and benefits

- The seal possesses complete and long-term resistance to oils, petrol, grease, diesel & coolants.
- Resistant to changeable weather conditions, temperature extremes (up to 350°C) and UV radiation.
- Highly and permanently elastic sealing properties

#### **Base materials**

#### Approved for use in:

- Glass
- Protected metals (aluminium, brass, copper, steel, zinc-plated metal sheet)
- Ceramics
- Glaze
- Concrete
- Masonry
- Plastics
- Metal Sheet & Profiles

## Installation guide

- 1. The surface, that silicone will be apllied on, should be clean, free of dust, grease, rust, remains of old seal and other substances that might weaken the cohesion.
- 2. Prior to application of silicone protect edges with masking tape
- 3. Cut the tip of the cartridge, leaving part of the thread. Screw the applicator on to the thread, then cut at the required angle to give an aperture width suited to the joint.
- 4. Use manual or pneumatic gun applicator.
- 5. Applied silicone may be smoothed with a spatula or similar tool. Moisten the spatula first in special wetting agent or detergent solution.
- 6. The silicone hardens by reaction with moisture from the air, so ensure well-ventilated conditions.
- 7. After completing the application, wipe tools with a paper towel and clean with solvent.

## **Technical Data**

Parameter		Value	Methods	
Application temperature	[°C]	+5 ÷ +40		
Coverage	-	18 linear meters of 4x4 mm joint per one 300 ml cartridge		
Thermal resistance (upon hardening)	[°C]	-40 ÷ +250		
Pretreatment time	[min]	10		
Curing time	[mm/24h]	2		
Hardening system	-	one-component-crosslinking with air humidity		
Hardening type	-	acidic-acetate		
Density	[kg/dm³]	1.28		
Shore A hardness	-	33	SHORE A Method, after 14 days	
Ultimate elongation	[%]	180	ISO 8339, +23°C	
Shrinkage	[%]	6		
Allowable deformation	[%]	25		
Packaging	-	300 ml cartridge		
R-SL-TK-05				
Colour	-	red		
R-SL-TK-07				
Colour	-	black		

Parameter		Value		
Storage temperature [°C]		+5 ÷ +35		
Storage	[month]	18		
	-	In originally closed containers, in cool and dry places.
