

D-TU U-Shaped post base

U-Shaped post base for anchoring of wood construction elements

Product information

Features and benefits

- Anchoring of wooden construction elements
- Wide bores in the baseplate allow fastening using durable anchors or screws
- The standoff helps prevent rot at the end of the posts installed in basements or exposed to weather or water splash
- Steel sheet thickness: 5.0 mm
- Hot-dip galvanized for enhanced corrosion resistance

Applications

- Wooden constructions
- Supporting posts
- Wooden fences
- Wooden decks
- Pergolas, bowers, sheds

Base materials

Suitable for use in

- Wood
- Timber
- Concrete

Installation guide

1. Choose the right size of post base
2. Set the post base in required place and position
3. Fasten the base plate using anchored studs or adequate screws
4. Place another element, set the required position and fasten it secure
