

MN-20-01 Combination pliers americana

Combination pliers (American type) with one-component handle

Features & benefits

- Tool is made of high quality carbon steel which provides its long service life
- The tool is protected with a galvanic coating which makes it resistant to corrosion
- Inductively hardened pliers allow you to cut a wire
- One-component handle with shaped hand protection prevents the contact with the metal part of the tool

Applications

- Intended for holding mechanical parts that are being processed in place and for cutting and bending wires

Users

- DIY enthusiasts
- Mechanics
- Fitters
- Electricians
