

MN-26-023 Cable cutter

Cable cutter for precise cable cutting

Features & benefits

- The ergonomic, two-component handle allows for long-term work without the feeling of fatigue, optimal power transmission and a secure grip
- The opening spring opens the cutter blades after cutting, making the work easier and faster
- Optimum blade geometry ensures cutting without crushing and deformation with minimum effort
- The mounting handle allows you to attach a leash so that the cutter will always be within reach
- The adjustable screw joint allows the blades to be precisely fitted
- The opening blockade keeps the jaws closed, protecting them against damage and facilitating storage

Applications

- Application during electrical installation works
- For cutting aluminum and copper single and multi-core cables

Users

- Electricians
- Fitters
- DIY enthusiasts
- Mechanics
