

## MN-65-198 Jig saw blades for stainless steel and aluminum

### Bimetal jig saw blades with milled, crossed teeth for cutting metals

### Features & benefits

- Bimetal blade enables you to cut stainless steel and non-ferrous metals
- Milled and alternately distributed teeth provide the quick cutting of metal
- Bimetallic blade makes the teeth very hard and the core flexible and resistant to fracture
- U-type handle, which is the second most popular blade mounting system (especially in older models of jig saws)

### Applications

- For cutting steel, stainless steel and non-ferrous materials e.g. aluminum, copper
- Intended for use with jig saws

### Equipment

- 3 blades per package

### Users

- Fitters
- Tinmen
- Locksmiths
- Plumbers
- DIY enthusiasts

### Corresponding products

- MN-92-105 Jig saw 500 W
