

Steel anchoring plate, 10x100x100, black steel

Innovative anchoring system of pavement cover based on bonded anchor

Product information

Features and benefits

- Quick and one-step installation of the anchor to the pavement cover
- An anchoring system for use during the construction of new bridges and renovation of bridge structures
- No need to protect the holes and embed the lower parts of the anchors in the platform slab before concreting
- Suitable for use in dry and wet substrates including under water
- Insulation tightness ensured
- Less probability of damaging the deck insulation
- Simpler construction of the anchor than the prefabricated solution
- No assembly problems occurring during the installation of traditional anchors

Applications

- Installation of pavement cover

Base materials

Approved for use in:

- Concrete C20/25-C50/60
