

MN-09-092 Universal lubricant spray 400 ml

Multi-purpose cleaning and lubricating agent WS-90 400 ml

Features & benefits

- Cleaning and lubricating aerosol with molybdenum disulfide MoS₂ is a preparation which not only cleans but also lubricates, leaving a protective layer on the surface
- Owing to its penetrating properties, the preparation penetrates hard-to-reach places and it cleans and protects them
- Owing to molybdenum disulfide and additives, the processing product protects against seizure and eliminates creaking noises made by working mechanisms
- Product removes rust and prevents its formation by repelling moisture from the cleaned elements.
- Owing to penetration into the cleansed elements the preparation helps to loosen parts such as hinges, screws and valves

Applications

- Agent is used for removal of greasy and oily contaminants from various types of metal surfaces including varnished ones
- Intended for cleaning engine parts and electric devices

Users

- Mechanics
- DIY enthusiasts
- Road workers
- Electricians
- Fitters
