- Quick tile levelling system for improved work quality
- Simple way to save time and increase performance
- Suitable for walls and floors
- Each system component can be purchased separately
- 4 clip thicknesses: 1, 1.5, 2, and 3 mm

### FEATURES AND BENEFITS

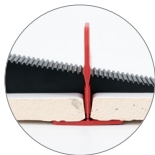

**WIDE RANGE OF APPLICATIONS** with 3–14 mm thick tiles makes it possible to level most tiles in common use.

**OPTIMISED CLIP PARAMETERS** make it possible to produce grout joints of 1-3 mm in width, while the 2 mm thick flat foot renders it suitable even for a very thin glue layer.

**HIGHER PRECISION OF WORK,** regardless of the tile size and type.

**PERFECT LEVELLING OF TILES** against one another, compensating for uneven substrates and differences in tile thickness.

**WEDGES MADE OF HARD AND RIGID PLASTIC** do not scratch tiles and can be reused many times.

**CLIPS MADE OF DURABLE AND FLEXIBLE PLASTIC** adhere perfectly to tiles.

**SPECIAL CLIP DESIGN** with a narrowed section at the foot to make sure that it breaks off in a way that does not hinder grouting (clip foot staying under the tile).

**HIGH-PRECISION PLIERS** make it possible to press the system elements against the tiles with sufficient force.
