

MN-70-502 Anodized spirit level 25cm SILVER, 90 °, 0 °, 2.3% slope, magnet

The highest quality, anodized spirit level 25 cm, produced in Poland, with a measurement accuracy of up to 0.4 mm / m.

**Features & benefits**

- Measurement accuracy up to 0.4 mm/m.
- Very good value for money and functionality.
- Polish production guarantees the highest precision of workmanship and its repeatability.
- 2 spirit levels show the vertical and horizontal.
- Spirit level without sharp edges, made of high-quality acrylic glass, can be easily and quickly cleaned of dirt.
- The anodized coating protects the aluminum spirit level creating an abrasion resistant protective layer.
- 100-year warranty for mounting and embedding the vials.
- The level vial has an additional scale that allows you to determine a 2.3% slope, which facilitates installation and finishing works.
- The alcohol-based liquid filling the vials is completely UV-resistant and does not fade with time, and the air bubble does not separate even after impact.
- DUAL PROTECT vials have double protection against breakage, thanks to which they guarantee high resistance to mechanical damage caused by a fall or impact.
- The spirit level has a magnet that allows it to be attached to steel elements.

Applications

- The spirit level intended for technical and construction works

Users

- Tilers
- Bricklayers
- DIY enthusiasts
- Gypsum plasterers
- Plumbers
