

RT-TBIT-ADAP

RT-TBIT-T25/M5

M5 THREAD
BIT ADAPTERS

The adapters for the M5 thread bits are perfectly suited for the installation of the R-GOK-II sleeves used when fixing insulation panels on flat roofs as well as for work performed in confined spaces and places difficult to access.

FEATURES AND BENEFITS

1/4" (6.35 mm) shank compatible with most screwdrivers and drill-drivers available on the market

Made of the 73MoV52 vanadium and molybdenum enriched tool steel, the adapter offers excellent durability, torsional strength, and fatigue resistance

The adapter diameter and length make the tool versatile and suitable for anchoring a wide range of screws and other fixings

When combined with the RT-TBIT-T25/M5 bit, the adapters prove perfectly fit for the installation of the R-GOK-II sleeves for flat roof insulation fixings

BASE MATERIALS

 Concrete

 Brick

 Ceramic ware

 Steel

 Wood

 Plastic

APPLICATIONS

Intended to be combined with the M5 bits for screw driving and other fixing applications

Using the M5 thread bit adapters boosts working efficiency when driving screws and performing other fixing applications in diverse substrates. The M5 thread bit adapters guarantee optimised performance, even if work is conducted in very narrow spaces, e.g. when fixing the R-GOK-II sleeves.

PRODUCT INFORMATION

index	Diameter [mm] / Size	Total length [mm]	QTY per primary packaging [szt.]	Weight in primary packaging [kg]	EAN
