

# R-GP6 FUEL CELL FOR WW90II WOOD NAILER

Gas nailer for WW90II wood nailer guarantees the highest operating parameters and high efficiency

## FEATURES AND BENEFITS

Clean Propane & Butane mixture reduces carbon residue

High quality propellant for increased performance

Contains a fully synthetic oil for lubricating the tool

Compatible with leading manufactures tools

The temperature range depends on the type of gas - details in the technical table

## BASE MATERIALS

 Powering gas powered timber framing nailers

The gas for the R-WW90II, created according to a new formula, guarantees the best operating parameters and high efficiency. Thanks to research, it was possible to minimize the potential number of misfires to 2%. By dividing it into seasonal versions, it can ensure the highest quality of work regardless of the ambient temperature. After a long research process, it is the best fuel source for the R-WW90II nailer.

## APPLICATIONS

Clean propane & butane mixture reduces carbon residue

Separating for two seasonal version ensures highest quality of work

High quality propellant for increased performance

## PRODUCT INFORMATION

Index	Fuel type	Lubrication	Size [mm]	Value	Operating temperatures [°C]	Efficiency [shots]	Box weight [kg]	Outer weight [kg]	EAN
R-GP6-S	Propan-Butan	propane & butane	165	80	5 - 55	min. 1000	0.40	4.00	590667551259
R-GP6-W	Propan-Butan	propane & butane	165	80	-8 - 25	min. 1000	0.40	4.00	590667551256
